

## WE ARE COMMITTED

Oliver Lumber is especially proud that all of its Ipe Decking and Ipe Siding products are sourced solely from Certified and FSC® Certified Brazilian sawmills, committed to harvesting selectively from managed tropical forests.

Our partners in Brazil carefully manage their forests in a sustainable and selective manner under strict government control. This adds value to their forests which prevents large-scale deforestation due to agriculture and other non-industrial uses. By adding value to their forests in this way, responsible forestry operations actually protect their long-term viability over more indiscriminate uses.

Our sawmill partners must pass a third party “Legal Verification Program” ensuring that their products pass a thorough analysis of their timber custody supply chain and that they are in accordance with Brazilian and International laws, including the Lacey Act and EU Timber Regulations.
